

RETAINING WALL

Retaining walls are relatively rigid walls used for supporting the soil mass laterally so that the soil can be retained at different levels on the two sides. Retaining walls are structures designed to restrain soil to unnatural slopes.

They are used to bound soils between two different elevations often in areas of terrain possessing undesirable slopes or in areas where the landscape needs to be shaped severely and engineered for more specific purposes like hillside farming or roadway overpasses.

Ifyou are needing a retaining wall, ask usabout GravityStone which are made inhouse and are one of the best deals in retaining wall products. We also carry many other styles of retaining wall products made at other top tier manufacturers.

GRAVITYSTONE® Evo

Retaining walls have many uses in landscaping asthey can beusedtosectionoffoutdoorspaces such as patios, used to create planting boxes or areas, or even to make smaller retainingwallstosectionoffunlevelterrains. It is this exact versatility that makes retaining walls so desirable to somanydifferent architects.ACMEcarriesmanytypes of wall products to fit whatever style suits you the best. GravityStone offers2 differenttypesofstructuralsystems-Tradition Core and Tradition Modular. Tradition Core helps to create durable retaining wallsthatcanbebuiltinawidevariety of ways. Tradition Modular helps to simplify things by being cost-effective, minimizing excavation,simplifyingconstruction, and eliminating structural and construction challenges.

GRAVITYSTONE® Evo

Evolved Design. Unmatched Flexibility

For over 30 years, GravityStone® has set the standard for innovation and flexibility in the segmental retaining wall industry.

Now, the next generation has arrived. GravityStone® Evo is a patented, fully engineered commercial grade segmental retaining wall block system that is lighter, stronger, and more versatile than ever before. Designed to reduce weight without compromising structural or geotechnical performance, Evo delivers unmatched efficiency in retaining wall construction.

With GravityStone® Evo, you get what other systems can't offer—lower costs, faster installation, reduced labor demands, and maximum design flexibility—all within a single, intelligent solution.

The 1-2 Advantage

- 1 Lightweight Product
  - 20% lighter than traditional SRW units, reducing labor strain, and increased productivity, increasing shipping ranges, and maximizing shipped sq. ft.
- 2 Structural Systems
  - MSE Walls for fill sites
  - Modular Gravity Walls for cut applications and tight spaces

So Simple. It's Advanced

Unit Dimensions

GravityStone Evo (MSE)
Evo(Fat Face 2.0)
Dimensions: 18" x 8" x 10.125"

GravityStone Evo (Modular)
Evo:18" x 8" x 10.125"
Trunk: 24" x 8" x 4"
Anchor Junction : 12" x 8" x 6"

Modular Dimensions

Evo Mini Cell
Dimensions:
18x8x24"

Evo Single Cell
Dimensions:
18x8x36"

Evo Single+ Mini Cell
Dimensions:
18 x 8 x 50"

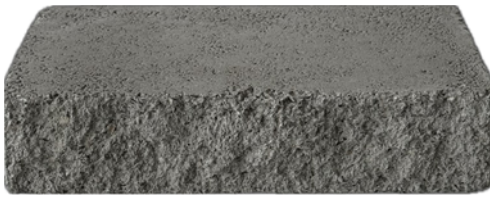

Evo Double Cell
Dimensions:
18 x 8 x 62"
